

Education

B.S. in Computer Systems Engineering at Palestine Polytechnic University

Aug. 2023 – Aug. 2027 (Expected)

- **GPA:** 91.4%
- **Major GPA:** 92.2%
- **Honors:** 6 out of 6 semesters.
- **Relevant courses:** Algorithms Design and Analysis, Computer Networks, Computer Design and Architecture, Cryptography and Cryptanalysis, Database Management Systems, Data Structures, Microprocessor and Interfacing, Object Oriented Programming, and Operating Systems.

Projects

[MIPS Pipeline Simulator](#)

December 2025

- Designed and developed a MIPS pipeline simulator in C++ for a 5-stage processor pipeline.
- Implemented hazard detection and resolution for data and control dependencies using forwarding, stalling, and instruction scheduling.
- Built Python-based performance visualizations to analyze pipeline execution and compare results.

[Competitive Programming](#)

November 2024 - Present

- Built and maintained a structured C++ repository containing reusable implementations of algorithms and data structures for competitive programming.
- Organized code by topic, including graph theory, dynamic programming, range queries, and string algorithms, to simplify revision and reuse.
- Converted source files into ready-to-print .docx documents to create a portable offline reference for training and contest preparation.

Skills

- **Programming languages:** C++ and Java.
- **Other:** Git and GitHub.

Honors, Awards, and Competitions

- **Africa and Arab Collegiate Programming Championship (2025):** Qualified to represent Palestine in the competition.
- **Hebron Code Jam (2026 and 2025):** 11th and 3rd place out of +45 teams in the contest, respectively.
- **Google HashCode (2026):** 4th place out of +35 teams in the contest.
- **Codeforces:** Earned the [Expert](#) rank, ranking within the top 14% of active participants on one of the world's most challenging and prestigious competitive programming platforms.
- **Palestinian Collegiate Programming Contest (2025 and 2024):** 8th and 20th place in Palestine, respectively.
- **IEEEXtreme (2024):** 3rd place out of 31 teams at our university.

Volunteer Experience

Competitive Programming Coach at PPU Code Academy

Jan 2024 - Present

- Helped 7 students qualify to PCPC 2025 and 4 students qualify to ACPC 2025.
- Currently mentoring 3 teams who rank among the top 5 at the university level.
- Trained +20 students in C++ and competitive programming basics, +10 students in data structures and simple algorithms, and +10 students in advanced algorithms.
