Hebron, Palestine

Basel Al-Jabari

Software Engineer

[Basel Al-Jabari](#)

[Basel-3mk](#)

Education

- B.S. in Computer Systems Engineering - Information Security, Palestine Polytechnic University. GPA: 91.3%. *Aug. 2023 – Feb. 2028 (Expected)*
- Honors in 4 out of 4 semesters.

Skills

- **Programming languages:** C++.
- **Data Structures & Algorithms.**
- **Object-Oriented Programming.**
- **Problem Solving & Competitive Programming.**

Projects

- [Data Structures & Algorithms](#): it's mainly for Problem Solving & Competitive Programming. It has Graph Theory basic & advanced algorithms, range queries' data structures (like Segment Tree and Fenwick Tree) & algorithms (like Mo's Algorithm). Moreover, it will have more algorithms as time going like string algorithms and dynamic programming.

Competitions, Exercises, and Volunteer Experience

- Participated in PCPC (2024, 2025), qualified to ACPC (2025), Hebron Code Jam (2025 - Achieving 3rd place out of 40 teams), IEEEExtreme (18.0 - 2024, 19.0 - 2025), which are national Competitive Programming contests that enhanced my teamwork skills, effective time management, solving complex problems under pressure, and improve my Data Structures & Algorithms skills.
- Served as a competitive programming coach for the PPU Code Academy Club at my university using C++, which helped over 20+ students get started with their journey in Problem Solving (C++ & Problem-Solving Basics – LVL1), helped over 10+ students be intermediate in Problem Solving (Data-Structures – LVL2), helped over 10+ students be advanced in Problem Solving (Algorithms – LVL3), and about 5+ of them were qualified to PCPC (2024 & 2025). My students' feedback about me was excellent. Also, this improved my communication, explanation, and presentation skills.
