# Basel Al-Jabari

## Software Engineer

[Basel Al-Jabari](#)

[Basel-3mk](#)

### Education

---

- **B.S.** in Computer Systems Engineering – Information Security, Palestine Polytechnic University. **GPA:** 91.4%. **Major GPA:** 92.2%.
- Honors in 5 out of 5 semesters.

*Aug. 2023 – Jun. 2027 (Expected)*

### Skills

---

- **Programming languages:** C++.
- **Familiar with:** C#, HTML, Java, Python.
- **Tools:** Git, GitHub.
- **Core Competencies:** Algorithms, Competitive Programming, Data Structures, Object-Oriented Programming, and Relational Database Design.

### Projects

---

- **Pipeline-Project:** Designed and developed a C++ MIPS Pipeline Simulator for a 5-stage processor pipeline, implementing data/control hazard handling, forwarding, stalling, instruction reordering, branch-flow simulation, and Python-based performance visualization.
- **Competitive-Programming:** Built and maintained a structured C++ Competitive Programming repository with optimized algorithms, data structures, and training materials used for contest preparation and coaching students in problem-solving.

### Competitions, Exercises, and Volunteer Experience

---

- **Expert** at **Codeforces**.
- Participated in several national Competitive Programming contests: **PCPC** (20<sup>th</sup> Place in 2024, 8<sup>th</sup> Place in 2025), qualified to **ACPC** (2025, Unable to attend due to VISA), **Hebron Code Jam** (3<sup>rd</sup> Place in 2025, 11<sup>th</sup> Place in 2026), and **IEEEExtreme** (2024, 2025). These contests enhanced my teamwork, time management, problem-solving under pressure, and Data Structures & Algorithms skills.
- Participated in **Google HashCode** (4<sup>th</sup> Place in 2026), where I optimized NP-Hard problems using advanced algorithms within time constraints.
- Served as a **Competitive Programming Coach** for **PPU Code Academy**. I trained **20+** students to start Competitive Programming with C++, **10+** reached the **intermediate** level with **Data Structures**, **10+** reached the **advanced** level with **Algorithms**, and about **7** qualified to **PCPC** (2025), **4** qualified to **ACPC** (2025). This improved my teaching, presentation, and communication skills.
